

## **ANNOUNCING ON DEMAND COURSE**

**We are on track to have our on-demand REHS Exam Review cloud course by late January 2021!**

**Even though it is an on-demand course, your registration includes our highly reviewed workbook you will use to highlight the concepts that you still need to master.**

If you want to start preparing now, please order our workbook now!

We are shipping daily except Sunday.

The course bundle is \$499.00 including S&H. The course includes our 450+ page workbook, recommended self-study guide, exam acronym list, and sample questions to help you prepare for the exam. When you **order your workbook now**, we will credit the cost of the workbook \$199.00 towards your course enrollment. That would leave a balance of \$291.00 to enroll in the online course when it is available in late January 2021.

### **Course roll out:**

Our first release in late January will be these 3 of 15 chapters.

Our Precious Water (potable water, wells, rivers, lakes)

Recreational Water Illnesses (pools, spas, beaches)

Private On-Site Wastewater (septic tanks, human wastes, subsurface absorption fields)

It will be the first of several rolling releases in January and February.

Other Chapters will follow soon after. Your enrollment will entitle you to access all 15 chapters for 3 months. That should give you more than enough time to digest the material. Then you should take the exam!!!

Even after your enrollment expires...your book will not expire! You will still have all the printed material in your hands that you need to pass the exam.

Your registration period of 3 months is based on the day you enroll in the online course, no matter what day or month!

Get on our **Reservation List NOW!** Registration is limited to the first 100 candidates.

Simply send an email to [Walter@RegisteredSanitarian.com](mailto:Walter@RegisteredSanitarian.com). In the Subject: "Online Course Reservation". You will be among the first to be notified of the release. No cost.

Looking forward to meeting you.... online!
